

SB 450 An Act Concerning Energy Conservation and Renewable Energy

Submitted by

March 20, 2012

I'd like to send testimony to the Energy and Technology Committee for the hearing on SB 450, *An Act Concerning Energy Efficiency and Renewable Energy*.

We were pleased to have an energy audit for our oil-heated home, done through the Home Energy Solutions program. We added insulation to the house as a result of the audit. Not only were we hoping to save resources; we were pleased to do our part to reduce our carbon footprint.

Not having this service available to oil-heated homeowners is irresponsible at a time when we must do all we can to keep air and water clean as well as mind our carbon footprints. The high cost of energy is another reason that all should have access to these audits.

I hope the committee forwards this act and sends the message of support for conservation of energy.

Sincerely,

Elisabeth Aurand
